

Morgana Jog-It
Intelligent anti-static jogging

Morgana Jog-It

Boost your productivity and get **flawless finishing results** with the Morgana Jog-It Anti-Static Paper Jogger — the **ultimate solution** for efficient, **professional paper handling**.

Engineered to complement your press and post-press operations, the Jog-It prepares paper stacks perfectly for finishing equipment such as collators, folders, and cutters. Its powerful vibration system and ionized air-assisted blowing work together to eliminate static electricity, remove toner/paper particles, and align paper edges with precision — the 50 degree angle adjustment ensures the correct collation so every sheet is ready for the next stage of production.

With adjustable air volume and jogging strength, you can easily tailor performance to suit any paper type or load size. Convenient operating modes — including air only, jog only, and a timer mode that continues jogging after the air stops — give you full control and flexibility.

Compact, reliable, and built for performance, the Morgana Jog-It delivers professional results in a small, easy-to-move design — making it an essential addition to any modern print environment.

Key Benefits

Exceptional performance: Unique vibration system for precise jogging, edge alignment, and faster drying.

Static-free operation: Ionized air blowing effectively reduces static and small particles.

Compact & portable: Space-saving design that fits seamlessly into any workspace.

Technical Specifications

Morgana Jog-It	
Paper stack (max)	90mm
Paper size (max.)	320 x 450mm
Vibration frequency	2800r/min
Power source	220v/50hz/1300w
Machine weight	32kg
Machine dimensions	420 x 550 x 1280mm
