Specification

Plockmatic SD-435e and SD-450e

Compact booklet making system, combines **robust** and **reliable** performance for a range of applications. **Now up to 47% faster.**²

Booklet making made easy

The SD-450e and SD-435e are versatile booklet makers designed for low to mid-volume digital production environments. Together, they deliver booklets of exceptional quality and is able to feed the new long printed sheets to produce a variety of applications, including A4 landscape booklets, which is becoming an increasingly important expectation of the device.

All production features like folding, spine forming, and full bleed trimming, are combined in one single, easy to use system. Its multi-purpose nature also allows for other finishing applications such as corner and edge staple documents. The new 50 Sheet Performance Kit radically improves productivity to **over 1000 booklets per hour** during inline operation².

Plockmatic SD-435e and SD-450e

Add our **signature square folded** finish to **A4 landscape format** documents

Key Features

- BookFold square spine booklets from A6 to A4 Landscape and beyond
- Corner stapled documents in portrait A4
- Edge stapled documents in portrait and landscape A4
- Up to 140 or 200-page booklet capacity
- Supports up to 660mm long sheets
- Average monthly volume of 30k booklet
- Max monthly volume of 40k booklets

High quality applications at speed

The latest generation booklet makers combine proven performance with enhanced productivity, delivering high-quality output for a range of applications. The booklet making productivity has been significantly improved compared to previous generation:

- Up to 8% faster on the SD-435e¹
- Up to 47% faster on the SD-450e with the new 50 Sheet Performance Kit²

The result is a production rate of **up to 752 booklets per hour**¹ for the SD-435e and **up to 1030 booklets per hour**² for the SD-450e.

50 Sheet Performance Kit

The additional boost in productivity of the SD-450e is made possible by the optional 50 Sheet Performance Kit. This kit not only increases productivity but also extends booklet capacity to 50 sheets of 80 gsm paper (up to 200 pages), compared to the standard 35 sheets on the SD-435e. The sheet capacity also allows for production of high-page number booklets with thicker media.

¹ Productivity numbers based on SD-435e and Konica Minolta AccurioPress 7136, compared to SD-450 and Konica Minolta AccurioPress C14000. 2 sheet A5 booklet run with A4 LEF 80gsm in test environment.

² Productivity numbers based on SD-450e and Konica Minolta AccurioPress 7136, compared to SD-450 and Konica Minolta AccurioPress C14000. 2 sheet A5 booklet run with A4 LEF 80gsm in test environment.

Plockmatic SD-435e and SD-450e

The **SD-435e/450e** is **compatible with** the following Konica Minolta **AccurioPress** print engines:

AccurioPress C4080 / C4070 / C84hc

AccurioPress C7100 ENHANCED Series

AccurioPress C14010 Series

AccurioPress 7136 Series

AccurioPress 6272P

Plockmatic SD-435e and SD-450e

SD-435e/SD-450e Booklet Makers

The SD-450e can staple and fold up to 50 sheets of 80 gsm, which creates booklets of up to 200 pages. The SD-435e is capable of 35 sheets creating 140 page booklets.

RCT Rotate Crease Trim module (optional)

The Plockmatic RCT Rotate Crease Trim module provides professional looking, full bleed trimmed and creased booklets. This option requires an FM-400e finishing module.

Finishing Module (optional) FM-400e

The optional Face Trimmer module includes a new face trimmer and square spine mechanism in one unit. This module is mandatory for the SD-450e.

Fold mechanism

The Patented fold mechanism gives a sharp fold for every application, resulting in professional looking documents every time.

Maintenance free staple heads

High-wearing parts are built into the easy to replace staple cartridge itself. You'll spend less time worrying about maintenance and more time making great looking booklets.

Hand feed capability

This feature allows output produced on other printing systems to be turned into high quality booklets.

Plockmatic VFX Vacuum Feeder

Inline or **Offline** using the same **booklet making modules**

Add a VFX feeder to the inline configuration to be offline

This makes the system incredibly versatile. The SD-450e and SD-435e can not only be installed inline with a Konica Minolta printer, it can now also be installed with a Plockmatic VFX feeder as an Offline or Nearline configuration.

Start off with an inline configuration and then transition to an offline configuration at a later stage if that suits your workflow better, this means that you no longer need to decide in advance if you want an inline or offline solution.

- Productivity of over 1,500 A5 booklets per hour³
- Productivity of over 1,200 long sheet booklets per hour³
- Up to 5,400 sheet high capacity vacuum feeder
- Plockmatic vacuum feed technology
- Adaptive fan control adjusts air flow
- Advanced double sheet detection
- Automatic Tray Switching allows for loading paper during jobs for uninterrupted production
- Enhanced performance on difficult curled media

³ Approximate figures, based on 2 sheet booklets

High Capacity 5,400 sheet Vacuum Feeder

The Plockmatic VFX Feeder

The Plockmatic VFX is a high-capacity Vacuum Feeder built for productivity and flexibility. With feeding resulting in over 1,500 A5 booklets per hour³, it handles a wide range of paper types and weights with precision.

Equipped with advanced vacuum feed technology, the VFX is designed to manage even the most challenging pre-printed media. Its Automatic Tray Switching feature enables long, uninterrupted production runs — allowing you to load empty trays while the job continues.

Designed for Performance

At the core of the VFX are two vacuum-fed loading trays. Each tray features dual double-sheet detection sensors that ensure flawless accuracy and consistent operation. Together, they offer a total capacity of up to 5,400 sheets (80 gsm) and support media sizes up to 660 mm long.

For environments with low humidity or static build-up, optional anti-static bars help maintain steady feeding and reliable performance.

Plockmatic VFX Vacuum Feeder

Automatic Tray Switching

Keep jobs moving without pause. The VFX's Automatic Tray Switching hands off seamlessly between the two vacuum trays, enabling long, unattended runs and letting you reload an empty tray while production continues. No stop-and-start - just consistent throughput on longer jobs with minimal operator intervention.

Adaptive Feed Settings

The VFX constantly monitors the feed area and automatically adjusts air flow to create the ideal feeding conditions throughout every job. This adaptive system ensures smooth handling of a wide range of media from lightweight to heavy, coated, or pre-printed sheets.

2D Barcode reader kit

When sheet integrity and document accuracy matters, the optional 2D Barcode Reader Kit brings an extra layer of confidence to your production. With a reader in each tray, every sheet is scanned to maintain set integrity and ensure perfect accuracy - ideal for financial reports, transactional documents, and personalized booklets.

The system supports DataMatrix and PDF417 codes (up to 24 characters each), with a minimum barcode feature size of 0.3 mm for dependable, high-resolution reading.

High Capacity 5,400 sheet Vacuum Feeder

Handling challenging media

Thin and curled sheets are no longer a challenge. The VFX's specially designed feed geometry enhances performance on delicate and curved media, ensuring consistent feeding quality under demanding conditions.

Plockmatic Multi-Purpose Stacker XL

Adaptable to your needs: From **small to large prints**, the **MPS XL** adjusts easily to meet the demands of **your print operation**

Optimizing Production Workflow

At Plockmatic, we understand the evolving needs of digital print workflows. Our MPS XL stands as a testament to our commitment to enhancing efficiency in the digital print industry. It serves as a crucial bridge between printing and finishing devices, ensuring the seamless creation of complete applications. We've designed the MPS XL to effortlessly accommodate oversized sheets, turning them into profitable applications with ease.

The integration with the MPS XL enables sheets to transition smoothly to subsequent finishing devices. Our commitment to flexibility and efficiency is embodied in the MPS XL Multi Purpose Stacker, which has been crafted to complement a range of Konica Minolta production printing systems. Its user-friendly docking/undocking mechanism and motorized stacking table simplify the handling of heavy paper stacks, thereby alleviating physical strain and optimizing workflow.

Plockmatic Multi-Purpose Stacker XL

Keep your projects **moving smoothly** from printing to finishing with **easy paper handling**

Key Features

- Capable of stacking a wide range of media, from 210mm x 210mm up to 330x1300mm
- Rated for a maximum load weight of 40kg
- Maximum stack height up to 175mm*
- Motorized stacking table allows lifting of heavy paper stacks to the desired height
- Easy-to-use docking mechanism and large casters allow for frequent docking and easy transportation of paper
- Integration with print engine allows the operator to pause and resume printing using the MPS XL user interface

*Depending in sheet length and density

From A4 to 1300mm

The Stacking Table accommodates a range of paper sizes, from A4 to an impressive 330mm wide and 1300mm long (maximum sheet size is determined by upstream print engine). The table automatically steps down in small increments as sheets are stacked. With two sections—one sliding into the other—the table is compact at 715mm and extends to a full 1300mm.

Integration

Our MPS XL seamlessly integrates with Konica Minolta's latest color print engines, including the AccurioPress C14010S Series, AccurioPress C7100 Series, and AccurioPress C4080 Series, enhancing operational coherence and efficiency.

Plockmatic Multi-Purpose Stacker XL

The **Plockmatic MPS XL** is **compatible with** the following Konica Minolta **AccurioPress** print engines:

AccurioPress C4080 / C4070 / C84hc

AccurioPress C7100 ENHANCED Series

AccurioPress C14010 Series

Plockmatic SC6500 Digital Die-Cutter

Plockmatic SC6500

The Plockmatic SC6500 is a high-performance, dual-tool digital cutter, designed for precision cutting and creasing on media up to 350 microns. It's ideal for print departments looking for an affordable, high-capacity digital die cutter for unattended operation.

The SC6500 features a unique vacuum belt feeder for reliable material handling and a camera registration system that ensures accurate cutting by reading QR codes.

The **SC6500** combines **ultra-reliable feeding** with an **instant job retrieval** system and flawless **high-speed cutting** and **creasing**.

Key Features

- **Dual-Functionality:** Capable of both cutting and creasing, allowing for diverse project handling without additional setup costs.
- **Speed and Efficiency:** Cuts at speeds up to 1060mm/sec, with an automatic feeder that can handle stacks up to 1,000 sheets.
- **Advanced Technology:** Includes ColorCut Pro software for seamless integration with design programs like Adobe® Illustrator® and CorelDRAW®. QR codes and SmartMarks ensure precise job retrieval and cutting accuracy.
- **User-Friendly Design:** Compact and mobile, with an ergonomic 7-inch touch screen for ease of use and a space-saving media catch tray.
- **Unattended Operation:** Features like the 8th generation Vision3 CCD camera and dual 'Grip and Drive' feed system allow for continuous, error-free operation on mixed job batches.

Plockmatic SC6500 Digital Die-Cutter

Unlock **next-level efficiency** with our enhanced **productivity options**

Productivity options

The optional ColorCut Pro Server Station further boosts workflow, offering a pre-installed PC, additional software licenses, and Template Maker for designing custom items. This setup provides a centralized control point for job management and streamlines production processes.

Efficient workflow

The SC6500 supports complete standalone operation, handling mixed jobs with ease. Its reliable feeding system and high-capacity auto feeder ensure smooth operation, while ergonomic design features facilitate integration into various work environments.

For businesses seeking to enhance their print department's capabilities with a versatile, efficient cutting and creasing solution, the Plockmatic SC6500 offers a blend of speed, reliability, and ease of use.

Plockmatic SC7100 Pro^T Digital Die-Cutter

Plockmatic SC7100 Pro^T

The Plockmatic ColorCut SC7100 Pro^T is a next-generation, dual-tool digital cutter and creaser that combines flatbed precision with sheet-fed automation. Designed for professional print environments, it offers a unique blend of cutting and creasing technologies to deliver accurate, high-speed production on media up to 450 microns.

Ideal for packaging, point-of-sale, and label applications, the SC7100 Pro^T provides the flexibility to produce any shape directly from your own printed artwork with no dies, delays, or complex setup.

Ultra-reliable **feeding**.
High-speed **cutting**.
Tangential **creasing**.

Key Features

- **Dual-Functionality:** The SC7100 Pro^T combines a passive drag knife and an active tangential crease wheel, enabling smooth, defined creases and precision cutting on a wide range of substrates up to 450 microns.
- **Speed and Efficiency:** Operates at speeds up to 1060 mm/sec, with an auto feeder that handles up to 1,000 sheets (sizes up to 340 × 710 mm). The advanced dual 'Grip and Drive' feed system ensures consistent, stable feeding and near-edge accuracy.
- **Smart Workflow Integration:** Fully compatible with ColorCut Pro – Production Studio, allowing full control of cut pressure, speed, and line actions. Integrated QR-code job retrieval ensures effortless, unattended operation even with mixed job stacks or rotated sheets.
- **User-Friendly Design:** A 7-inch immersive touchscreen with live camera preview offers intuitive operation and advanced control. The pivoting screen, retractable media tray and mobile nature with lockable casters make it easy to integrate into any workspace.

Plockmatic SC7100 Pro^T Digital Die-Cutter

Active Tangential Creasing applies **up to 2,500 gf** for perfect precision **on thick and demanding media**.

Tangential Creasing Technology

At the core of the SC7100 Pro^T is its active tangential creasing system, a premium feature that sets it apart from conventional drag-knife cutters. The creasing tool lifts, rotates, and lowers with precision, applying up to 2,500 gf of force for sharp, accurate creases on thick card and packaging materials. This technology ensures smoother folds, cleaner edges, and superior quality results across a broad range of applications - from packaging prototypes to custom short-run production.

AI Control and Automation

The SC7100 Pro^T is powered by next-generation AI-driven ColorCut Pro software, redefining automation and ease of use. The system identifies every sheet via a printed QR code, instantly retrieves the correct cut file, and applies pre-defined parameters for cutting and creasing. This intelligent automation ensures flawless results - even with mixed or rotated sheets - minimizing operator input and virtually eliminating setup errors. Whether in Direct Mode (PC-connected) or HELD Mode (standalone), the SC7100 Pro^T delivers exceptional flexibility, reliability, and speed.

ColorCut Pro Server Station and Software

ColorCut Pro Server Station

The ColorCut Pro Server Station is the central hub of the ColorCut system designed to maximise workflow efficiency and automation for busy print and finishing environments.

Pre-installed with the full ColorCut Pro software suite, it provides a single control point for job creation, management, and production monitoring across multiple devices. Operators can view live cutter status, queue jobs, and ensure every file is cut accurately and consistently.

Centralised Job Management

The Server Station connects all ColorCut systems on the network, allowing multiple users to send and track jobs in real time. Designers submit cut files directly from their workstations, while operators can instantly preview and prioritise production. This removes manual file handling, reducing setup time and keeping workflow fully synchronised from design to output.

ColorCut Pro Job Library Manager

The Job Library Manager stores every project in a single, searchable database - complete with QR code and job number links for instant retrieval.

Each job remembers its settings for cut depth, pressure, and speed, enabling perfect repeatability. Shared access across departments ensures consistent results and full traceability of every design, file, and production run.

One easy, connected workflow **for Every ColorCut System.**

Template Maker

The Template Maker tool streamlines structural design by generating ready-to-cut packaging templates from simple dimensions. Users can instantly create boxes, sleeves, or displays with pre-calculated folds and flaps, then apply artwork directly in Adobe® Illustrator® or CorelDRAW®. This eliminates guesswork and saves valuable design time for short-run or custom packaging projects.

Integrated Efficiency

Together, the Server Station, Job Library Manager, and Template Maker form a connected workflow that bridges design and production. Every project can be created, stored, and cut with full automation, ensuring precision, repeatability, and faster turnaround times.

When paired with the Plockmatic ColorCut SC6500 or the SC7100 Pro^T, this software suite delivers a complete, intelligent cutting solution linking creativity, control, and productivity in one powerful system.

SC7100 Pro-T - Machine dimensions

We make booklets. We also mail, fold, crease, perforate and bind documents with extraordinary precision.

Quite simply, we turn stacks of printed paper into the **beautifully finished documents** you use *every day*.

Plockmatic Group develops, manufactures and markets an extensive range of document finishing systems sold under the Plockmatic and Morgana brand names. These products work inline or offline together with the world's best digital printing systems.

Plockmatic works closely with Konica Minolta to ensure the easiest possible integration of the booklet making system. With new simplified programming, this makes it easy to use and allows operators of different skill levels to produce a wide range of booklets efficiently.
